- Extend and show date & time in delivery or pickup columns for the tables in time slot allocation.
- Extend truck sizes for cars and semi-trailer.
- Add overbooking number defined in Hub Management in Dock calendar.
- Add compartment section in the time slot allocation calendar view.

### Change

- Updated copyright statement.
- Existing submenu function „edit time slot“ has much more powerful options now for editing/moving timeslot into future.

### Fix

- Enable non-admin users to change their own user object.
- Fix user deletion.
- Add missing truck and trailer plate data to allocation search model.
- Show last days filter in TO monitoring view. Change filter range to 2 days and checked it by default.
- Adjust calculation of total gross weight in shipment view.
- Multiple minor fixes.
- Fix register ULI page and show pickup/delivery addresses correctly.
- Fix remaining drive time calculation.
- Return soft error message when max service time has exceeded.
- Revert sorting loads without timeslots to old version (by status) and changed filtering logic.
- Fix invalid sort order for loads without dock allocation view.

### **ASN App Fix**

- Update translations for app components and app errors.

### **XMS App Change**

- Adopt loading list.

### **Gate App New**

- Extended trucks sizes for cars and semi-trailers.
