# Release Notes

The following table provides information about what is new and what has changed since the last release:

Date (Version)		Description
2020-03-02 (1.28.1)		<p><b>Web UI New</b></p> <ul style="list-style-type: none"> <li>○ Added single sign on for Bosch users: Identification of Bosch internals via ADFS (Single Sign-On via NT-User).</li> </ul>  <ul style="list-style-type: none"> <li>○ Added the information „Truck_ID“ &amp; „ULI Group Number“ in the General Report, the magnifier search in Dock calendar and in Gate App.</li> <li>○ New enhanced search options and interface in Monitoring ULI.</li> </ul>  <ul style="list-style-type: none"> <li>○ New event information for ULI Event “Deleted”</li> <li>○ Added “Swap Body Flag” in „Monitoring ULI“ and Gate App</li> </ul>  <ul style="list-style-type: none"> <li>○ Integrated “Planned &amp; actual Service Time” into the „General Report“ and „Monitoring ULI“.</li> </ul>

- New column „elapsed“ in Time Slot Allocation.

(24.02.2020) Load List		
NEW		
Elapsed	ULI	ULI Group Name
2d 1h 6m	175f0bf1b93645aa9e1eb3	-
2d 6h 14m	ea1d738428a64956aff7cf	-

- New option to filter for „Deleted“ State in Monitoring ULI.
- Two Pop-Ups implemented for „ULI Group“ (triggered out of list „ULI without Time Slot Allocation“ and triggered out of Dock Calendar - sub menu „Call to Dock“) are synchronized in their „Look & Feel“.
- New warning for „Outbound ULI“ in case linked „Inbound ULI“ are not yet finalized (ULI linked to same „ULI Group“).
- User can now select if timestamps are displayed in “user selected time zone” (via user profile) or in the “time zone from the event’s location”. Timestamps will be displayed according to this user selection.
- Now „Carrier ID“ is displayed (besides „Carrier Number“) during „Web ULI“ creation.
- Updated driver and vehicle information prior to pick-up: „Truck Plate“, „Trailer Plate“, „Driver Name“ and Driver „Contact“ (cell phone number).
- Updated execution status codes for “Track & Trace” with each Load/ TO in iNet combined with the correct status code.

#### Fix

- Fixed an issue with Initial/last timeslot booking fields in „General Report“.
- Fixed the issue with „deleted „ULI belonging to „Multi ULI Group“.
- Fixed the issue with data not being refreshed after allocating ULI collection.
- Fixed the issue with properties being improperly marked as mandatory on excel configuration view.

#### ASN App New

- New configurable ASN header qualifier freely selectable for ASN message.

#### Fix

- Fixed the issue with Label Generator (1.0) crashing when special characters are entered into the fields.

#### Driver App New

- For paperless incoming and outgoing goods without delivery documents in paper form, a digital signature is required for the POD in the Driver App.

#### Fix

- Fixed the issue with Tour being unable to be finished, because truck was not released for departure from HUB.

#### Gate App New

- „Seal description“ is now a mandatory field in seal picture control.
- Truck size and truck trailer plate is now visible in the loading list.

#### Fix

- Fixed the issue with being unable to delete Gate ULI’s.
- Fixed a bug in Truck Security so that all captured comments and/or photos (common & seal) are visible in „Monitoring ULI“.
