Release Notes

The following table provides information about what is new and what has changed since the last release:

Date (Version)		Description
2020-04-07 (1.29.1)		Web UI New Dock&Yard:

- Driver, Truck, Load and Loaner Phone information can now be updated within Dock Calendar in addition the lists “Loads without Time Slot Allocation” and “Loads without Dock Allocation”, as long as the latest ULI Event is not „Arrived at Dock“.

- Users are now able to correct information like Truck Size, Truck Plates, Loading Types, Goods Types or Driver Names, which could be wrongly input during „Truck Registration“.

- Links for ULI and Load are now displayed in lists „Loads without Time Slot Allocation“ and „Loads without Dock Allocation“.

Loads without Time Slot Allocation

(03.03.2020) Load List

Elapsed	ULI	ULI Group Name	Origin	Load ID	Cc	Actions
1h 15 m	c9ef9624232d4338ab2571		Web	ssqwe11	X-1	

Track&Trace Monitor:

- New classification of filters to reduce complexity:
 - Basic filters: Region, Status, Direction, Transport Mode, Pickup ID, Delivery ID
 - Advanced filters: Plan data source, Actual data source, Delivery Service, Service Level, Carrier ID, ATD, ATA, ETD, ETA

Transport Order | Load | Delivery Note | Handling Unit | Material | BGTW

Show all | | Planned Arr. To 06.04.2020 - 07.04.2020 |

Apply filters | Reset

Region | Status | Direction | Transport Mode | Pickup ID | Delivery ID

Advanced filter

TO | Load | Material P/N | Origin | Delivery Service | Service Level | Carrier ID | ATD

ATA | ETD | ETA

- Improvements and updates for English, Spanish and Portuguese languages.
- Users can now select the formatting of the displayed timestamps in their profile (according to defined standards):
 - 2019-14-12 04:00:00 PM (CEST) (American Standard)
 - 2019-12-14 16:00:00 (CEST) (European Standard)

Example: 7 de abr. de 2020 11:41

Fix

- In „Load overview“, the individual Handling Unit weight is displayed, instead of the summed up weight over all units belonging to the same transport order (TO).
- Users can now be deleted even though open „Reset Password Requests“ are present
- Fixed a bug responsible for making some created ULIs not appearing on the TO Monitor.
- Fixed the bug causing created „Search Tags“ to be automatically deleted when user „Refresh“ the data in „Monitoring ULI“ (Dock&Yard).
- Transport Order link for the material number was removed.
- When typing in customs coordinator phone number, the input should be cleared upon reaching unknown length (instead of after eight characters).
- Fixed the Newsletter subscription features.

XMS App

New

- Improved performance of the auto-complete feature, while searching for handling units that are waiting for inbound sorting.

Gate App

New

- New enhancements in Gate ULI creation that ensures tour for a Gate ULI to start right after it has been assigned to a device and saves manual workload during Truck Registration.
 - Added ULI Number of created Gate ULI
 - Existing button „Register“ changed to „Register this Gate ULI“
 - Added new option to „Create next Gate ULI“
 - Added new option „Registration arriving Truck“ (that starts the existing screen with same name)
 - The created Gate ULI will automatically start on Driver app after being scanned and linked to a load.
- The Dock Worker signature and the Seal ID are now displayed at the Monitoring ULI details information.

Called to Seal Picture Control (Apr 6, 2020 11:24 AM)

ULI Comment

Truck Comment
-

- Filters „Truck Plate ID“ and „Truck ID“ merged into a combined search filter for Monitoring ULI.
- New option to perform a single security check for multiple ULIs in the same entering or departing Truck. In order to use this new feature, this option must be first manually activated.

Connected HUB MEE (Hatvan)

Name	SSCC1
Connected HUB MEE (Hatvan)	001
Security overdue time (in minutes)	Registration duration (in minutes)
2	5
Security check entering trucks	Security check departing trucks
Enabled	Enabled
ULI Cleanup before registration (in days)	ULI Cleanup since registration (in days)
0	0
Number of parking spaces	Waiting area
24	Enabled

- New option „ULI Cleanup“ that, when enabled, creates a new ULI Event „Cleaned“ for when the latest ULI Events is older than defined number of days. For definition of parameter to activate this feature, see „Hub Management - Yard Information“.

Connected HUB MEE (Hatvan)	
Name	SSCC1
Connected HUB MEE (Hatvan)	001
Security overdue time (in minutes)	Registration duration (in minutes)
2	5
Security check entering trucks	Security check departing trucks
Enabled	Enabled
ULI Cleanup before registration (in days)	ULI Cleanup since registration (in days)
85	85
Number of parking spaces	Waiting area
24	Disabled

[Edit](#)

- Additionally the new filter „Cleaned“ was added in the ULI Monitoring.
